The image is a composite of two screenshots from a Windows 10 environment. The top screenshot shows the 'Optional features' settings window. It has a green title bar with the text 'Ws 10 Kowalski1 [Uruchomiona] - Oracle VM VirtualBox'. The window title is 'Optional features'. On the right, there are links for 'Related settings' and 'More Windows features'. Under 'Latest actions', three items are listed: 'Narzędzia administracji zdalnej serwera: Narzędzia usług Active Directory Domain Services i LDS Active Directory' (Installed), 'RSAT: DNS Server Tools' (Installed), and 'Narzędzia administracji zdalnej serwera: Menedżer serwera' (Installed). A 'See optional feature history' link is at the bottom. The 'Installed features' section has a search bar and a 'Sort by: Name' dropdown. One feature is listed: 'Faksowanie i skanowanie w systemie Windows' (17,8 MB). The bottom screenshot shows a Windows Explorer window titled 'zarządzanie_domena_nocon_local - [Console Root\Active Directory Users and Computers [Glasgow.nocon.local]]\nocon.local'. The left pane shows the folder structure under 'Console Root'. The right pane shows a table of containers with columns 'Name', 'Type', and 'Description'. An 'Add or Remove Snap-ins' dialog box is open in the foreground, showing a list of available snap-ins (like Active Directory Users and Computers, Group Policy, etc.) and a list of selected snap-ins. The dialog has 'Add >' and '< Remove' buttons. The taskbar at the bottom shows the Start button, a search bar, and several application icons. The system tray shows the date and time as 11/30/2022, 6:42 PM.
